

# Project Case Study

## Piddle's Next Phase

<b>Owner:</b>	<b>Piddle Brewery Ltd.</b>	<b>LEADER Priority:</b>	<b>2: Support for micro and small business</b>
<b>Location:</b>	<b>Piddlehinton</b>	<b>Outputs:</b>	<b>2.5 jobs to be created</b>
<b>Project size:</b>	<b>£81,292.38</b>	<b>LEADER Grant:</b>	<b>£32,516.95</b>
<b>Start Date:</b>	<b>January 2017</b>	<b>End Date:</b>	<b>May 2017</b>

The project was designed to enable a small local brewery to increase production, reduce costs and increase the range and flexibility of their product. It involved the purchase and installation of four new fermenting tanks and a bottling line and labelling machine directly within the brewery.

The new stainless steel tanks have increased production capacity and improved management of consistency and quality. Prior to the project, beer was transported elsewhere for bottling and labelling. This can now be done in-house.

The new bottling capacity and increased production will enable the company to create 2.5 FTE new jobs.
